

Make art

with the Art Gallery of New South Wales

**Do you love
to make
things?**

Artists love to create.

For centuries, artists have created artworks and objects inspired by animals to tell stories and to illustrate characters from myths and legends.

3D elephant

Create your own patterned three-dimensional elephant by decorating and cutting out the shapes on the next page. Cut along the solid lines marked on the elephant and gently curve the body in half and slot it into the slits on the legs. Glue the head to the body to finish your elephant. (Tip: to make your elephant more stable, glue the template to piece of card before cutting out the shapes).

You will need:

A4 piece of card

Scissors

Glue

Textas, paints or colouring pencils

Your imagination!
